Medicare Physician Fee Schedule

PAYMENT SYSTEM FACT SHEET SERIES

ICN 006814 December 2014

Please note: The information in this publication applies only to the Medicare Fee-For-Service Program (also known as Original Medicare).

This publication provides the following information about the Medicare Physician Fee Schedule (PFS):

- ❖ Physician services;
- ❖ Medicare PFS payment rates; and
- ❖ Resources.

Physician Services

Medicare Part B pays for physician services based on the Medicare PFS, which lists the more than 7,400 unique covered services and their payment rates. Physicians' services include the following:

- ❖ Office visits;
- ❖ Surgical procedures;
- ❖ Anesthesia services; and
- ❖ A range of other diagnostic and therapeutic services.

Physicians' services are furnished in all settings including:

- ❖ Physicians' offices;
- ❖ Hospitals;
- ❖ Ambulatory Surgical Centers;
- ❖ Skilled Nursing Facilities and other post-acute care settings;
- ❖ Hospices;
- ❖ Outpatient dialysis facilities;
- ❖ Clinical laboratories; and
- ❖ Beneficiaries' homes.

Medicare PFS Payment Rates

Payment rates for an individual service are based on the following components as shown in the Medicare PFS payment rates formula on page 3:

- 1) Relative Value Units (RVUs);
 - Work RVU;
 - Practice Expense (PE) RVU; and
 - Malpractice (MP) RVU;
- 2) Conversion Factor (CF); and
- 3) Geographic Practice Cost Indices (GPCIs).

Medicare PFS Payment Rates Formula

Each component of the Medicare PFS payment rates formula is discussed in more detail below.

1) Relative Value Units (RVUs)

Three separate RVUs are associated with the calculation of a payment under the Medicare PFS:

- ❖ **The Work RVU** reflects the relative time and intensity associated with furnishing a Medicare PFS service and accounts for approximately 50 percent of the total payment associated with a service;
- ❖ **The PE RVU** reflects the costs of maintaining a practice (such as renting office space, buying supplies and equipment, and staff costs); and
- ❖ **The MP RVU** reflects the costs of malpractice insurance.

2) Conversion Factor (CF)

To determine the payment rate for a particular service, each of the three separate RVUs is adjusted by the corresponding GPCI. The sum of the geographically adjusted RVUs is multiplied by a dollar CF. The statute specifies the formula by which the CF is updated on an annual basis.

The formula specifies that the update for a year is equal to the Medicare Economic Index (MEI) adjusted up or down depending on how actual expenditures compare to a target rate called the Sustainable Growth Rate (SGR). The MEI is a measure of inflation faced by physicians with respect to their practice costs and general wage levels.

The SGR is calculated based on:

- ❖ Medical inflation;
- ❖ Projected growth in the domestic economy;
- ❖ Projected growth in the number of beneficiaries in Fee-For-Service Medicare; and
- ❖ Changes in law or regulation.

However, in recent years, Congress took action to establish a specific update amount.

3) Geographic Practice Cost Indices (GPCIs)

GPCIs are adjustments that are applied to each of the three relative values used in calculating a physician payment, as described above. The purpose of these adjustments is to account for geographic variations in the costs of practicing medicine in different areas within the country.

You can use the Physician Fee Schedule Search Tool located at <http://www.cms.gov/apps/physician-fee-schedule> on the Centers for Medicare & Medicaid Services (CMS) website to obtain national and local payment rates. The Medicare Learning Network® (MLN) publication titled “How to Use The Searchable Medicare Physician Fee Schedule (MPFS)” located at http://www.cms.gov/Outreach-and-Education/Medicare-Learning-Network-MLN/MLNProducts/Downloads/How_to_MPFS_Booklet_ICN901344.pdf on the CMS website provides information on how to use the Physician Fee Schedule Search Tool.
